

# Rear your career

As a globally operating animal nutrition company we are specialized in feed additives. Growing dynamically, we are innovative with our roots in Niederzissen near Bonn. To continue our success story we are looking for a

## **Director Research and Development (feed additives)**

You will be responsible for the development of market oriented products and the optimization of the existing portfolio. In close cooperation with Sales, Production as well as Marketing, you will initiate new projects for the profound support of animals' health and performance. You will actively be in touch with customers, opinion leaders and universities. Coordinating tasks, conducting trials and testing results with exclusive customers will be among your responsibilities. Apart from covering the scientific aspects, you are in charge of feasibility, cost efficiency and road mapping.

You are an Agricultural Scientist or Veterinarian with preferably a doctoral degree in livestock production, animal nutrition or a similar field. Ideally you have 3-5 years experience in R&D or the production of feed or feed additives. You are business fluent in English.

We are looking forward to you as a dedicated and solution oriented team worker. Please apply to the following address via e-mail or letter: Josef Felder, Human Competence Center AG, Altkircherstrasse 8, CH-4009 Basel, [basel@hcconline.ch](mailto:basel@hcconline.ch). Feel free to ask about the position and contact Mr. Felder at +41 61 307 9 307.
