Ready for an upgrade? Apply now!

We are an 'innovative employer with a great team'. At least, that's what current and former employees say about us on review portals. We would just add that we are a hidden champion. A family business with its roots in the Eifel region, we distribute worldwide and provide our customers with innovative solutions that sustainably improve animal welfare. Our multinational team of experts works from our headquarters in Niederzissen as well as various locations around the world. Together, we are committed to making animal nutrition healthier, more successful and more sustainable.
In order to meet the current challenges of digitisation, we are searching for an

IT System Administrator (m/f/d)

You enjoy:

> providing lifecycle management for the entire IT infrastructure (hardware and software), including support
> evaluating, testing and integrating new hardware and software solutions
> actively participating in or independently implementing and documenting IT projects

You have:

> professional certification, a degree or a comparable background in IT or systems engineering with several years of professional experience
> a structured and independent approach as well as a strong team and service orientation
> proficiency in Microsoft applications and services
> preferably, knowledge of MS Navision, IT security, firewalls and Veeam

You can expect:

> a high level of responsibility with plenty of room to develop and implement your own ideas
> trust-based working hours and various mobile working options
> a flat organisational structure in a value-driven family business that has been named 'Top Arbeitgeber im Mittelstand' (Top 'Mittelstand' Employer) by FOCUS magazine
> the best team in the world
