

Dr. Eckel registers Anta®Ox Aqua: Award-winning additive for aquaculture now available in Indonesia

Registration officials released the good news right at the end of year: Anta®Ox Aqua from Dr. Eckel has been successfully registered and will from now on be available through the German company's local distribution partner, PT Dian Langgeng Abadi.

Anta®Ox Aqua, which is manufactured at Dr. Eckel's production site in Niederzissen, Germany, has been developed for the specific purpose of increasing animal welfare and reducing the need for antibiotics. The pure botanical feed additive is widely known for its anti-inflammatory and antioxidative effects. With Anta®Ox Aqua, fish and crustaceans will cope better with stress even under variable environmental conditions and show higher growth and survival rates. Furthermore, with its specific particle structure, Anta®Ox Aqua allows application in all kinds of aquaculture. The product uniquely combines health protection and welfare improvements with performance enhancement and efficiency. Thanks to Anta®Ox Aqua, producers benefit twice: They save on medication costs, and they yield higher profits.

»We are honoured and proud that with yet another efficient, high-quality product in the portfolio of our esteemed distribution partner PT Dian, we will continue serving the agriculture industry and, ultimately, the people of the Republic of Indonesia«, says Dr. Bernhard Eckel, Vice President Sales. »Anta®Ox Aqua is one of our most innovative and effective products, a phytogenic power pack of the latest generation. Providing nutrition for animals and humans that is safe, sustainable and sufficient, is one of the main targets of our industry. Healthy animals produce healthy, quality food. Therefore, animal welfare goes hand in hand with efficiency. Any investment in animal welfare, from feeding to husbandry, pays off. And it all starts with the feed as the first part of the production chain.«

About Dr. Eckel

Dr. Eckel Animal Nutrition: quality, modern animal nutrition made in Germany. The company was founded by Dr agr. Antje Eckel in 1994. The start-up has developed into an international hidden champion in the field of innovative feed additives for livestock and aquaculture.

Dr. Eckel is regarded as a pioneer in the industry. The products, distributed worldwide, combine commercially successful animal nutrition with animal welfare. Repeatedly acclaimed by the research sector and industry, Dr. Eckel's products make a major contribution to sustainable food production.

More than 90 employees from 20 countries—highly qualified experts in agricultural science, veterinary medicine, microbiology, chemistry and pharmacy—research and work towards making animal nutrition healthier, more successful and more sustainable. More than 10 per cent of our

revenue is invested in innovation every year. Numerous prizes for innovation, funding from the European Regional Development Fund and the State of Rhineland-Palatinate among others, and lively dialogue with international research institutes are ample testimony to the reputation that Dr. Eckel has earned through its constant leadership position. Antje Eckel herself has been commended for her entrepreneurial work several times. Minister Peter Altmaier appointed her to the advisory board of the Federal Ministry for Economic Affairs and Energy in 2018.
