

# Passionate pioneer? Apply now!

We are an "innovative employer with a great team" (at least that's what current and former employees say about us on review portals). We just like to say "hidden champion". A family business placed in the greater Bonn-Koblenz region, we distribute worldwide and provide our customers with innovative solutions that sustainably improve animal welfare. Our multinational team of experts works from our headquarters in Niederrissen as well as various locations around the world. Together, we are committed to making animal nutrition healthier, more successful and more sustainable.

In order to continue our path of healthy growth and to create the innovations of tomorrow, we want you for

## Product Development (m/f/d)

### You love to:

- > explore new fields and improve and monitor existing products
- > drive innovation and work in an interdisciplinary team
- > develop processes to create new products to support animal health or technically implement bioprocesses
- > design new test-series
- > research about new possibilities, markets, or pharmaceutical developments
- > participate in representative tasks, moderation of workshops, trade fairs and events

### You have:

- > a passion for and a degree in pharmacy or industry related fields
- > a scientific mind and way of working
- > expertise and experience in processing heterogeneous data sources, applying statistical methods and writing scientific articles
- > ideally some experience in project management, fundraising, innovation management or product development processes
- > fluency in English and German

### You can expect:

- > a varied working day and lots of flexibility in a secure industry
- > remuneration based on performance and a beautiful workplace in the countryside
- > a flat organisational structure in a value-driven family business that has been named 'Top Arbeitgeber im Mittelstand' (Top 'Mittelstand' Employer) by FOCUS magazine
- > the best team in the world
